

Flynn Pyc

Web Developer / Designer

About

I'm a Front End Web Developer with an  for Design

I like making things that solve problems, are easy to use, and make people feel good. I want to be involved in bringing a product from design to market. *(and back to design again if necessary!)*
I pride myself on being resourceful and a continuous quick-learner.

Projects

Universal Consultants Scheduling

STANDALONE APPOINTMENT SCHEDULER

Allows users to securely log into their account, make and track appointments, customers, and generate reports. Includes timezone conversions, custom factory patterns and data validations. UI designed with Figma. Built with Java connecting to a MySQL DB.

AcadPlanner

ANDROID TASK MANAGER APP

Task manager app with a persistent local database. Provides notifications, reports, and GPA calculations.
